The Lasur Chemical Plant,
just north of the Red October Plant in Stalingrad. The Lasur plant was destroyed during the war and had not been restored by September 1949.
observe any preparations for clearing work or for any reconstruction. **
25X1C

Comment. The Lasur plant was a lacquer and dye factory. According to available records it had been converted to the production of phosgene, chloropicrin and hydrocyanic acid in wartime. The 1941 work force was indicated at 500.
